BASELINE SWITCH 2900

The new 3Com Baseline Switch 2900 Plus Family is the latest addition to the highly successful 3Com family of value networking products, delivering enterprise-class Layer 2 Gigabit functionality, customized and priced for small and mid-sized organizations. These managed switches offer tremendous value to small and medium businesses looking for a low-cost solution who need a level of control over their network not offered by unmanaged switching products, without sacrificing the advanced functionality normally found on higher-end managed switching products.

OFFICECONNECT® MANAGED GIGABIT POE SWITCH

The all new OfficeConnect Managed Gigabit PoE Switch delivers an identical feature set to the Baseline 2900 Plus family but is priced and packaged for small and mid-sized organizations as well as remote enterprise branch offices. This low cost yet extremely well-featured and powerful, compact and completely quiet switch offers unmatched flexibility. Use it as:

- > A small office standalone switch
- > A small workgroup edge switch
- > A small business aggregator (with other 10/100 switches connecting to it)
- > A small server farm aggregator
- > A small, VoIP deployment PoE switch

The above are some of the potential applications but the opportunities are endless.
